

SPECIALS E500

Integrated Smart Terminal

New Generation Electronic Cash Register Solution | All-in-one housing unit: tablet, printer, PED, ports | Modular design concept | Seamless user experience | PayDroid based on Android

Compact & Innovative

Supported by the PAXSTORE open software distribution platform, within which payment service providers create and manage their own independent appstore marketplaces.

Improve and modernize your checkout areas by replacing old fashioned cash register equipment with one of the stylish E-Series workstations from PAXTechnology.

The E500 is ideal for fashion & hospitality merchants requiring a more cost efficient and space saving solution.

Data input by staff is easier on this large tablet colour touch screen, while opposite is an integrated Q20 payment acceptance module.

An inbuilt camera enables barcode & QR code scanning, while the base unit houses a printer with automatic receipt cutter and multiple ports for connecting peripheral hardware.

A merchant's total cost of ownership is drastically reduced when using the E500.
